

# IoT Virtual Bootcamp

December  
12 – 14, 2017

# Microsoft Artificial Intelligence and Machine Learning

Ted Way, PhD  
Senior Program Manager,  
Microsoft Azure Machine Learning

@tedwinway  
tedway@microsoft.com

# Overview

- Cognitive Services

- AI “out of the box” for computer vision, speech, language, search, and knowledge

- Bot Framework

- Azure Machine Learning

- Enterprise AI tool
  - Model training on Spark CPU or Azure Batch GPU clusters
  - Operationalization to Docker containers
    - Integration with IOT Edge for ML on the edge device

- Roadmap

- Acceleration on FPGA

# Use Cases

## Personalization

## Customer Churn

## Anomaly Detection

## Operational Efficiency

## Demand Forecast

Customer stories are categorized by top use case, but may fit into multiple use case categories.

# Rolls-Royce

## Filtering the signal from the noise

### Objectives

Connect Rolls-Royce jet engine data to Microsoft's intelligent cloud for insights to improve aircraft performance, safety and maintenance.

### Tactics

Use Cortana Intelligence to scale quickly and efficiently, aggregate data across customer fleets and process data in real time.

### Results

- More efficient flight and maintenance plans
- Targeted and actionable fuel efficiency insights
- Quickly-generated reports and dashboards that tell compelling stories and deliver high-quality insights

“Our goal is not data for the sake of data, but to embrace the cloud and analytical technologies to deliver more expert insights to the right stakeholders at the right time.”

Nick Farrant  
Senior Vice President, Rolls-Royce

Rolls-Royce®

# Rockwell Automation

Cutting costs up to 90 percent  
with predictive maintenance

 Operational  
Efficiency

## The challenge

Like other major companies worldwide, Rockwell Automation needed better, faster, and cheaper ways to manage and analyze ever-increasing amounts of data. They wanted to integrate predictive maintenance and calculate optimal efficiency of automated parts.

## Machine Learning in action

- **Reduced maintenance costs by up to 90%** through full pipeline visibility
- **Identified potential for millions of dollars in savings** by increasing water pump efficiency by 1%
- **Cut development time by 80%** when rolling out a new system on Hadoop

“We can take analytics to an entirely new level—the level of predictive, actionable analysis—with Azure Machine Learning.”

Juan Asenjo  
Lead Architect for Remote Monitoring at Rockwell Automation

**Rockwell**  
**Automation**

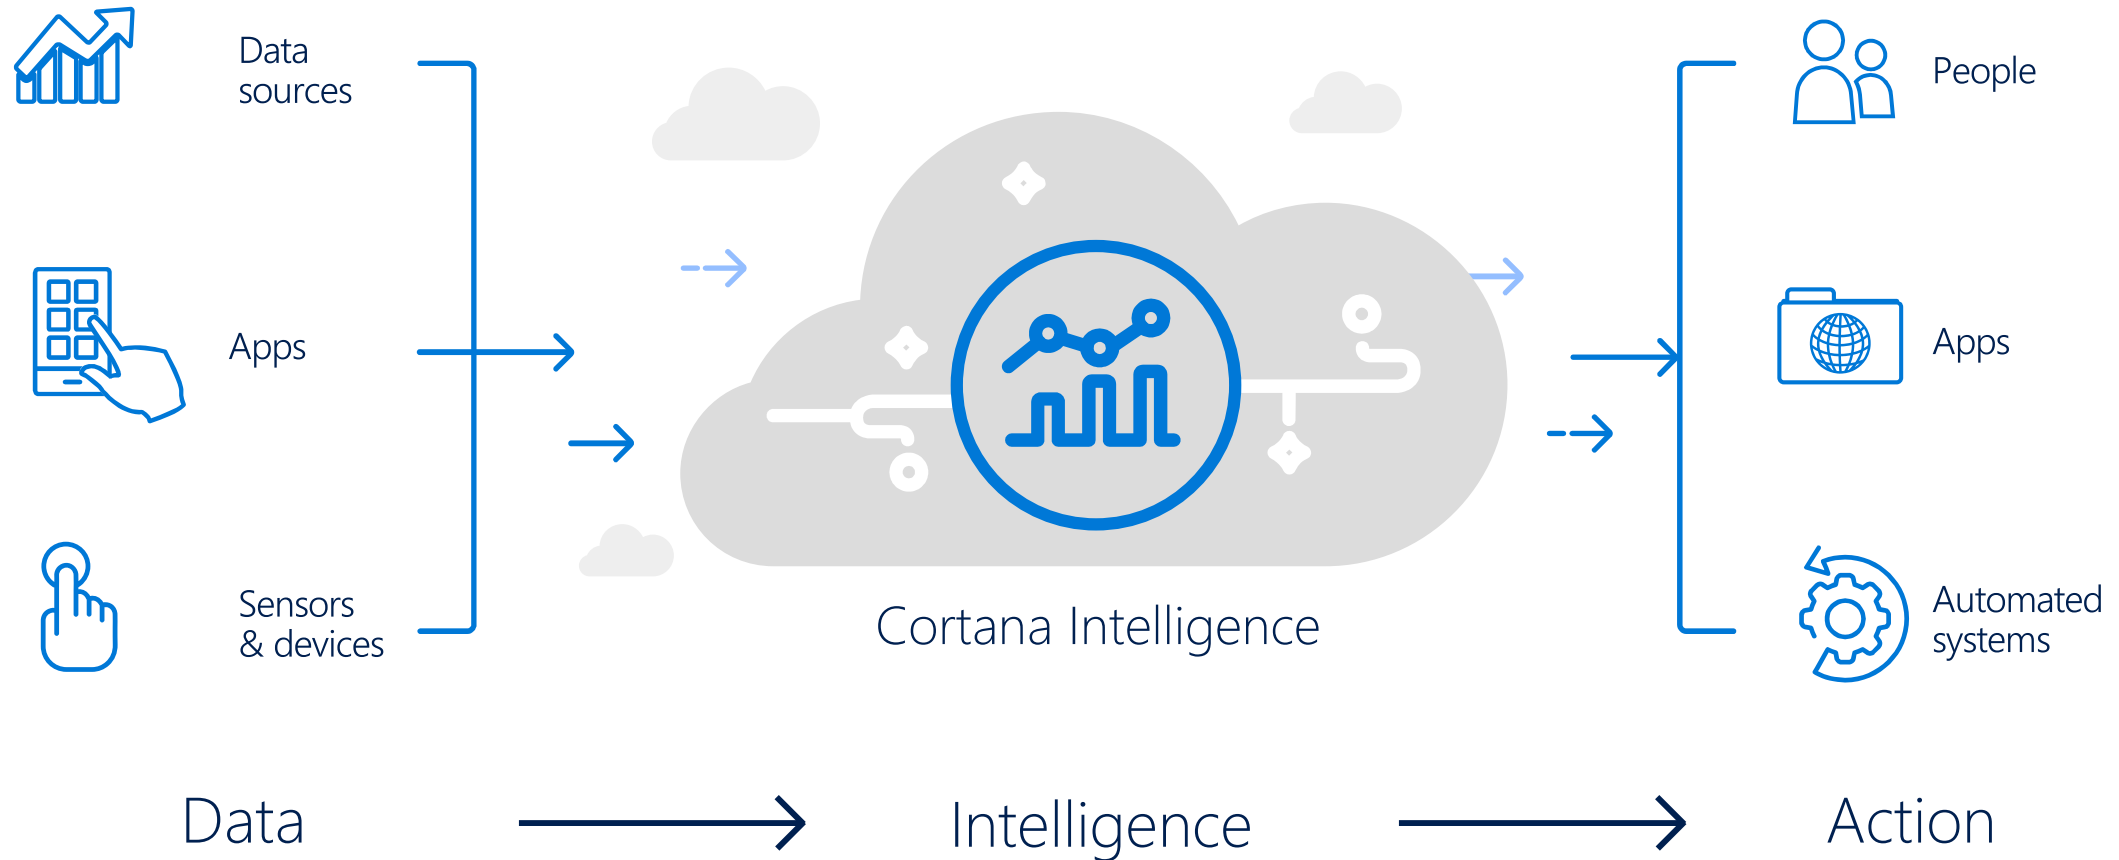

# Inventory Management

**Arcelik A.Ş.**

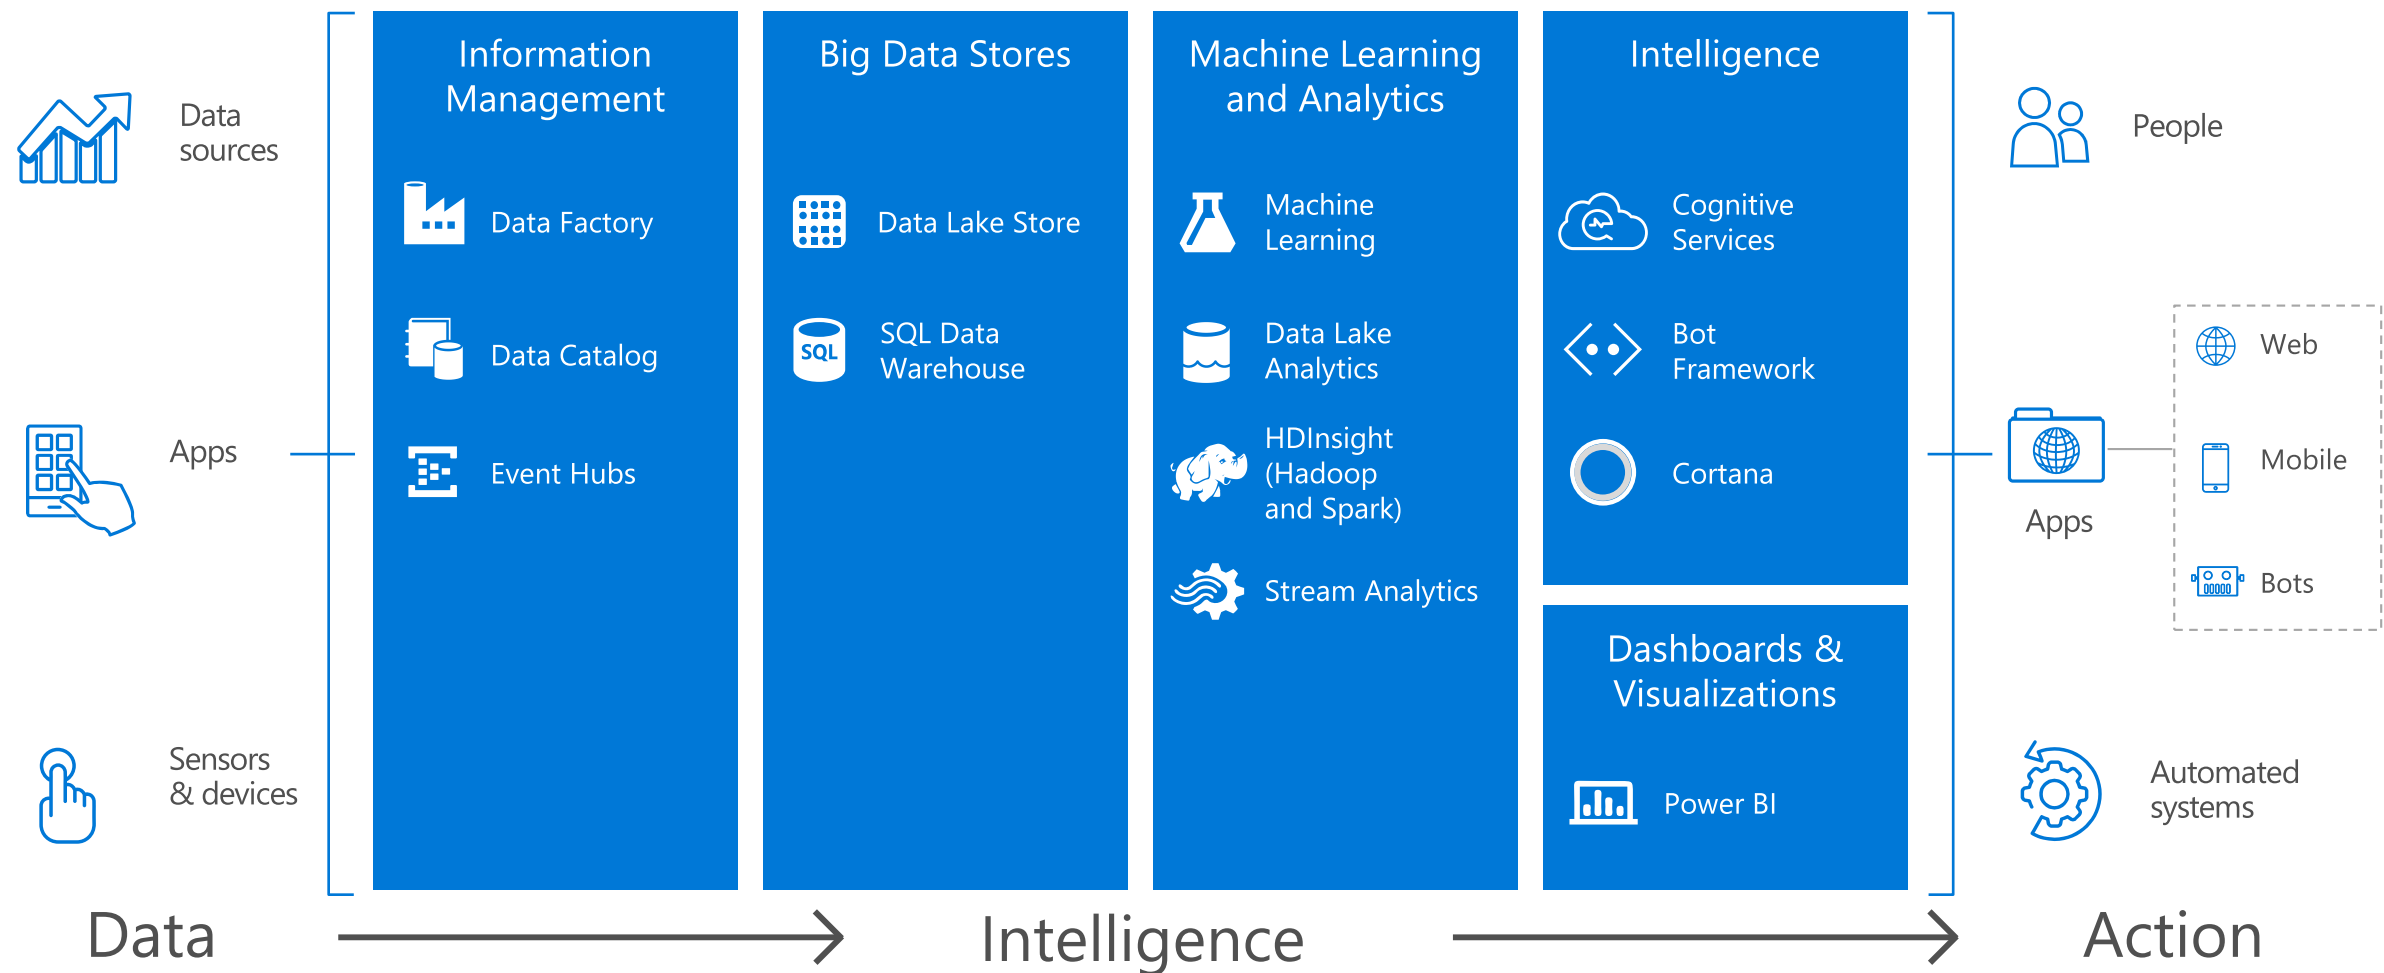

- Arcelik mfg. and sells appliances, TV, ACs, etc. in 135 countries
  - 10K product SKUs, 350K spare parts catalog
- Problem: Spare part inventory management
  - Right parts available at the right time
- Solution: Inventory forecasting
  - Every month, spare-parts demand data is uploaded, algos forecast next 12 mos
  - 80% accuracy rate vs. 60% with previous solution
  - Forecasts for all 350K spare part SKUs vs. 100K (manually)
  - Inventory turnover boosted by 10%
    - Spare parts put to use faster, reduction of storing, managing, financing parts

# Cortana Intelligence Suite

# Cortana Intelligence Suite Services

# Our approach

Solutions

Extensible applications

Cognitive services

Bot framework

Easy to consume  
Artificial Intelligence

Data Science tools

Data preparation, modeling, and operationalization

Most comprehensive  
data science capabilities

Deep Learning– Cognitive Toolkit

Best of Microsoft research  
and open source

Analytics in Big Data Stores

(cloud + on premise)

Flexible infrastructure  
support for analytics

## The Microsoft Cognitive Toolkit

A free, easy-to-use, open-source, commercial-grade toolkit that trains deep learning algorithms to learn like the human brain.

[The Microsoft Cognitive Toolkit](#)[Features](#)[Getting Started](#)[Model Gallery](#)[Tutorials](#)[Articles](#)

# Microsoft Cognitive Services

Easy

Roll your own with REST APIs  
Simple to add: just a few lines of code required

Flexible

Integrate into the language and platform of your choice  
Breadth of offerings helps you find the right API for your app

Tested

Built by experts in their field from Microsoft Research, Bing, and Azure Machine Learning  
Quality documentation, sample code, and community support

# Azure Machine Learning

# Azure Machine Learning – A Modern Platform for Machine Learning & Data Science

## Intelligent Data Prep

- ML assisted data wrangling
- By-example transforms
- Visual data inspectors
- Reusable steps
- Exportable to Python/PySpark
- Wrangle locally & scale to the cloud
- Plug-n-play data source construct

## Agile Experimentation

- Increase rate of experimentation
- Deep Learning & Spark made easy
- Big data and big compute
- Experimentation-as-a-Service
- Experiment locally and scale to cloud

## Life-Cycle Fundamentals

- Model metrics
- Model lineage tracking
- Run history
- Version control through Git
- Run artifacts management
- Auditable
- Explainable
- Reproducible

## Operationalization

- Docker-based deployment
- Create and manage model packages
- Low-latency real time APIs
- High-throughput batch APIs
- Performance monitoring
- Model retraining

Open Source ML Toolkits

CNTK, TensorFlow, scikit-learn, Spark ML, 10k+ CRAN-R/Python packages...

Open Platform & IDEs

Docker, Spark, Kubernetes, VS Code, RStudio, PyCharm...

Microsoft Magic Sauce

PROSE, Azure ML libraries for Spark, RevoScaleR Framework ...

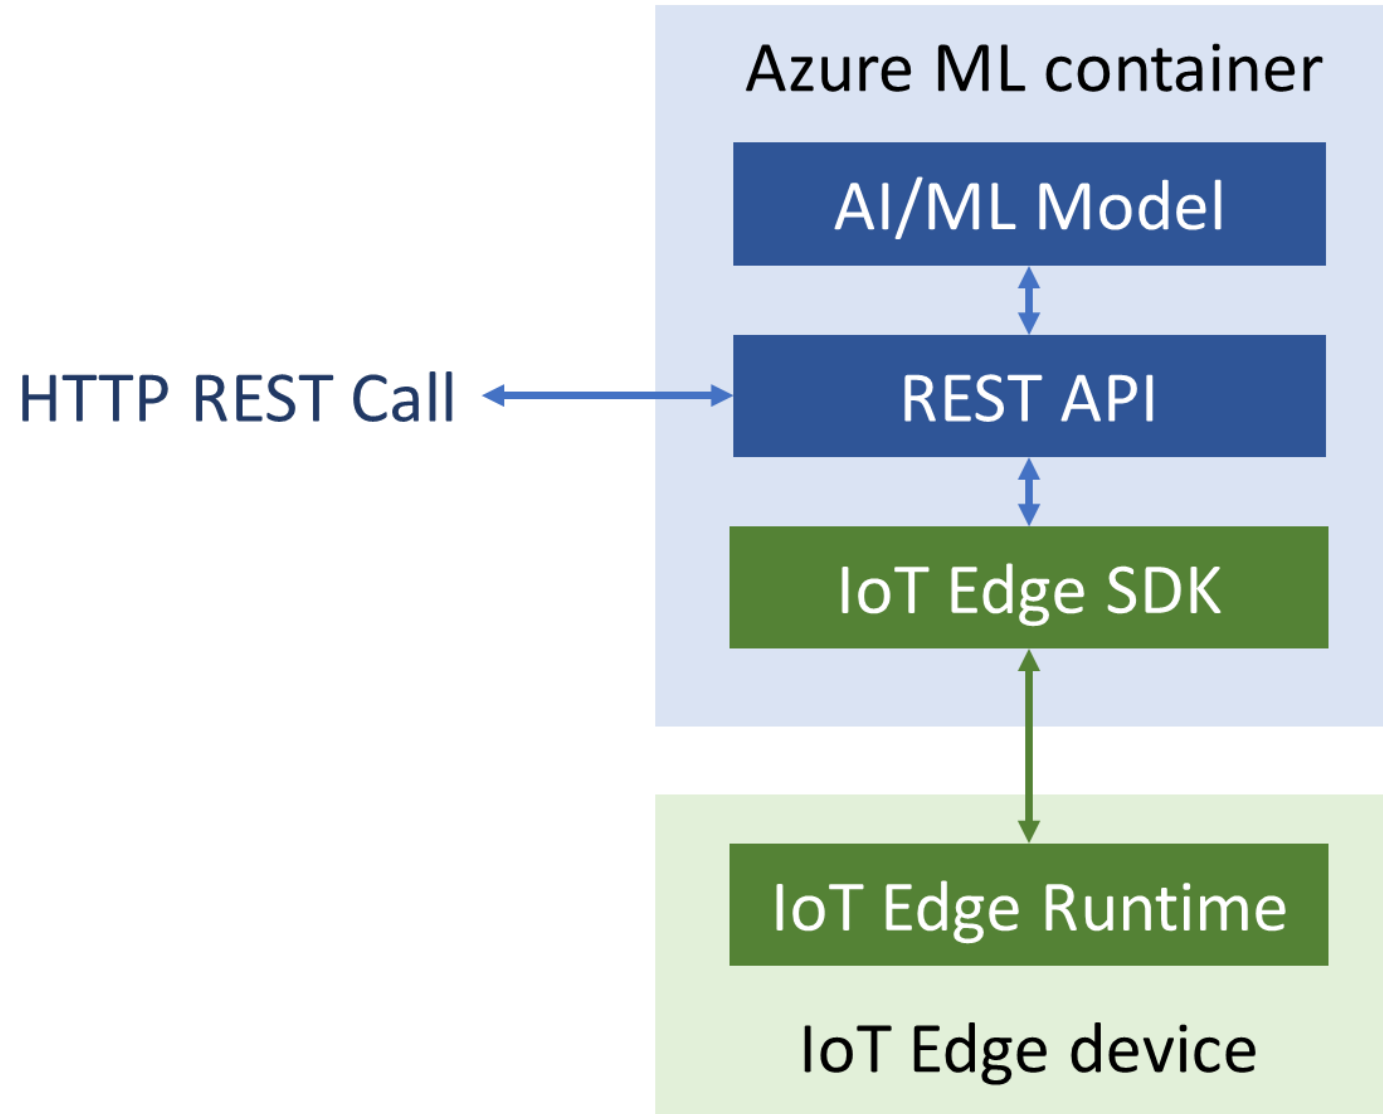

Enterprise Readiness

Compliance, Security/Encryption, VNets, Redundancy, Multi-Geo

Cloud infra. + Advanced Hardware

Azure VM, HDI with Spark, Azure Batch, GPU, FPGA...

# Azure ML Container Integrated with IoT Edge

# FPGAs

# The rise of deep learning in ML

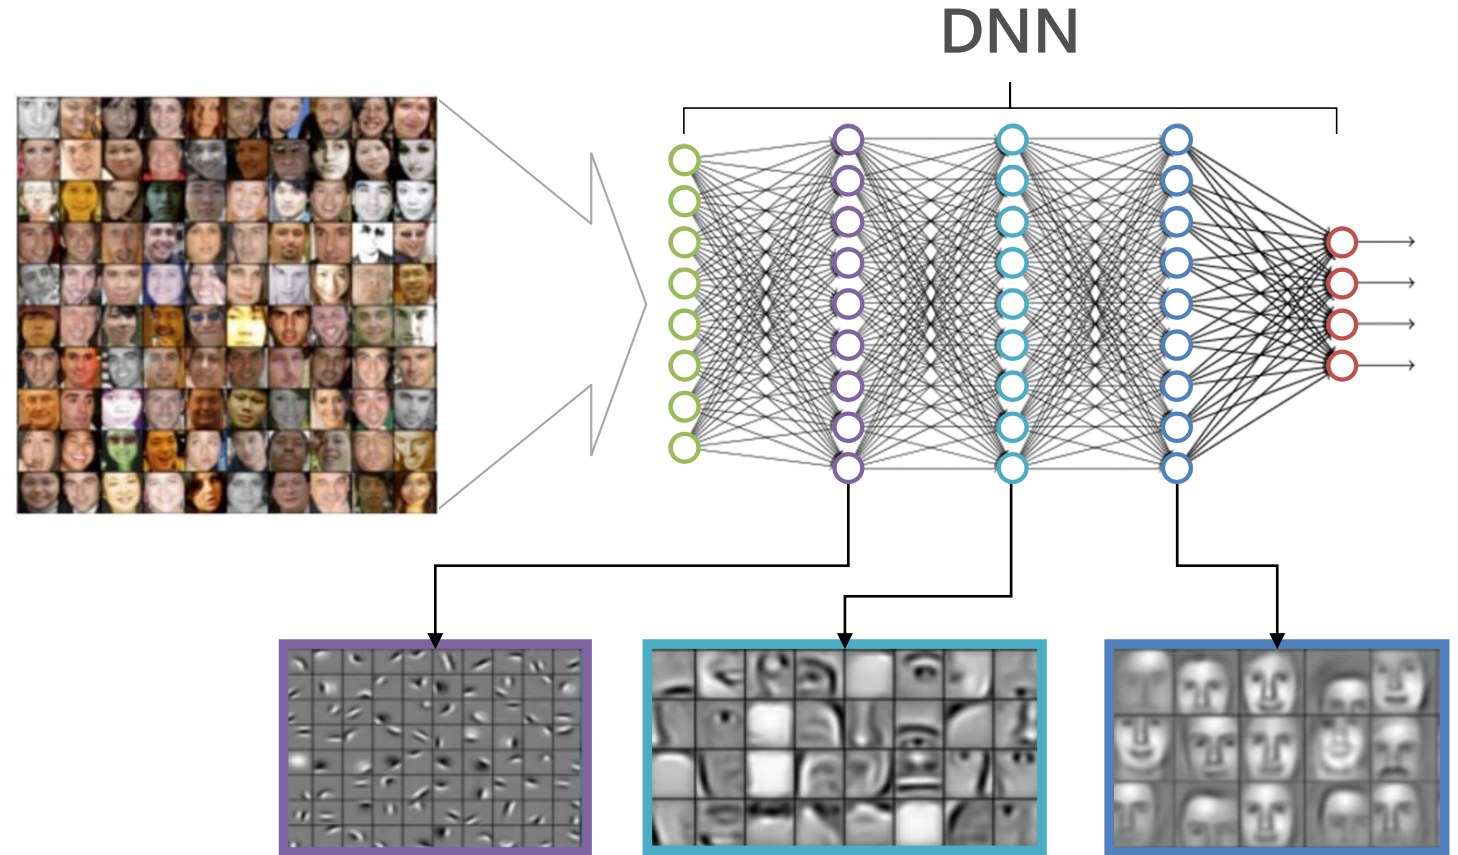

**Deep neural networks (DNN)**  
have led to breakthroughs in  
**major AI problems**
